Dear Robert

The attached drawings are intended to obviate the set of drawings which were sent to you 14/6/01 where the squared bridging sections of the belt hook had been replaced with radial curves. Please accept these drawings as the correct drawings to go with the above application.

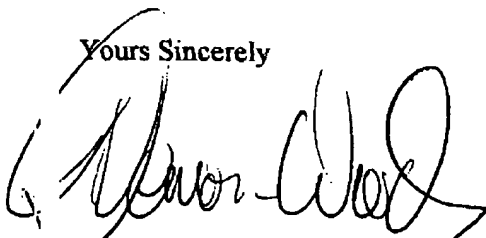

Also attached is a revised description of the preferred embodiment of the hook.

After I fax these documents to you, I will follow up with a phone call to make certain that you have received them.

Your continued assistance with this project is greatly appreciated.

With thanks, I remain

Yours Sincerely

Don Vernon-Woods
